

## Executive Biography

---

### Richard Romley

#### Vice President of Engineering

Mr. Romley joined EGS in January of 2006 and brings a wealth of leadership and experience in accelerating the introduction of new and derivative products to the organization. He brings practical skills in medical product design, material sciences, and other valuable analytic competencies. Mr. Romley drives the design process and manages the functional relationships across the organization.

Prior to joining EGS, Mr. Romley was Director of Research and Development and Chairman of the Patent Review Board for Boston Scientific Corporation's imaging franchise where, during his tenure, the franchise grew from \$80 million to \$170 million in sales. Prior to Boston Scientific, Mr. Romley held a number of leadership positions including Vice President of Technology & Operations at BioInterventional Corporation and project management positions at Prolifix, Heartport, and Baxter Healthcare Corporation.

Mr. Romley holds several patents and earned a degree in Mechanical Engineering from San Diego State University.
